Day 3 Welcome

Paul Macklin, Ph.D.

 @MathCancer

PhysiCell Project

July 28, 2021

LUDDY

SCHOOL OF INFORMATICS, COMPUTING, AND ENGINEERING

PhysiCell Project

PhysiCell.org

 @PhysiCell

Today's Goals

- Learn about contact functions
- Learn about intracellular modeling with SBML / ODEs / libRoadrunner
- Team Formation

Agenda

asynchronous
9:30-10:30 (optional)

Session 9 Pressure and Contact testing
A.Montagud: PhysiBoSS enables multiscale
simulations of signaling pathways

watch online
Lecture Hall

Public Sessions

11:00-11:10

Welcome

Lecture Hall

11:10-12:00

Session 10

Contact examples

Lecture Hall

12:00-12:15

Break

Gather Fountain

12:15-13:15

Session 11

Intracellular Modeling Part 1

Lecture Hall

13:15-13:30

Break

Gather Fountain

13:30-15:00

Session 12

Intracellular Modeling Part 2

Lecture Hall

15:00-15:45

Break

Gather Fountain

15:45-16:45

Team Time 1

Gather Collaboration Room

16:45-17:00

Break

Gather Fountain

17:00-17:50

Cross-Pollination: Brief Presentations

Gather Collaboration Room

17:50-18:00

Day 3 Wrap-Up

Gather Collaboration Room

See <https://github.com/PhysiCell-Training/ws2021/blob/main/agenda.md>

Private Sessions

Funding Acknowledgements

PhysiCell Development:

- Breast Cancer Research Foundation
- Jayne Koskinas Ted Giovanis Foundation for Health and Policy
- National Cancer Institute (U01CA232137)
- National Science Foundation (1720625)

Training Materials:

- Administrative supplement to NCI U01CA232137 (Year 2)
